

2-Chute Sandbag Machine

Sandbag Filling Equipment

The Gravity Fed 2-Chute Sandbag Machine is a sandbag filling machine that can fill 2 sandbags simultaneously. Made in the USA, this piece of sandbag filling equipment is self-contained and can be transported easily with a forklift or even in the bed of a pickup truck.

The 2-chute sandbag machine will fill 400-500 bags per hour, depending on the manpower behind your machine and the material being processed. Three people are needed to operate it: one person to man each chute and another to keep the sand hopper full and prod the material when needed. Operation of the machine is facilitated with the included ladder.

Features

- Strong Steel Frame
- 2 Sandbag-Filling Chutes
- 400-500 Sandbags Per Hour
- Optional Towing Package

Benefits

- Quickly Fills Sandbags
- Simple to Use and Fill
- Helps Protect Against Water Damage
- Lightweight and Transports Easily

Applications

- Emergency Flooding
- Hurricane Preparation
- Water Control
- Hazardous Containment
- Soil Erosion
- Fire Control
- Roadway Construction
- Barricades
- Bagging Compost
