

500 Gallon Fire Fighting Trailer Emergency & Multi-Purpose Water

The Fire Control Water Sprayer Trailer is a durable workhorse for emergencies and so many other purposes. Fill the tank from virtually any water source, whether municipal, water storage tank, pond, or stream. You'll have peace of mind while towing the trailer where it needs to go on your property, with its rugged 6" channel iron frame construction and surge brakes for safety. Use the fire hose to spot spray specific areas or use the spray bar on the rear of the trailer for blanket coverage. The spray bar produces a 25' spray swath, powered by the Honda engine and Tsurimi pump.

When not needed for fire emergencies, use the Fire Control Water Sprayer Trailer to pre-wet for fire prevention, manage control burns, and haul water to remote locations. You can also use it for watering vegetation and dust control. Strictly for on-property use, this trailer is great for adding savings to your budget as you won't be paying for DOT required features.

Features and Benefits

Features

- 500 gallon algae resistant tank
- 2" Tsurumi pump and 4 hp Honda engine
- Heavy duty 6" channel iron frame
- Suction hose and pond strainer, fire hydrant adapter
