

Arena Water Trailer

Superior Dust Control

Arena Dust Control Trailer

Moistens dirt and maintains dust control, keeping your competition area safe. Sprayer creates the proper dirt consistency and precise moisture needed for a level, dust-free surface. Ensure reliable, consistent footing and rider safety with our heavy-duty arena water trailers.

The Right Water Trailer

Consistent water distribution is vital for both indoor and outdoor arenas. Use to moisten dirt for your arena groomer or controlling dust on the roads and parking lots around your facility. Ideal for:

- Horse arenas
- Arena dirt packing
- Stall cleaning and spraying
- Dog racing tracks
- Motocross
- Cleaning arena drags
- Go-kart facilities

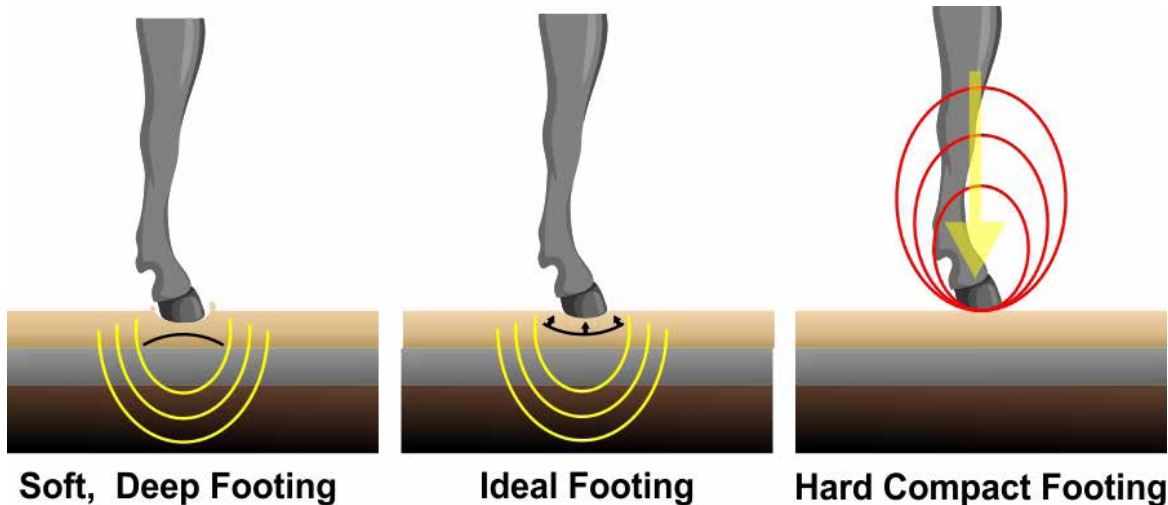

Importance of Arena Maintenance

For indoor and outdoor arenas to stay at their peak, keeping them well-maintained is essential. Arenas provide horses with the right amount of cushion, good traction, and minimal dust. The base of the horse arena can last a decade, but care and maintenance affects its durability.

Maintaining moist footing is essential in a riding arena. The stability of the footing is dependent on routine watering, which helps bond sand fibers together and contributes to optimal arena conditions. Keeping your arena at its best helps eliminate inconsistencies, keeps the arena dust-free, and builds confidence in your horses.

Features & Benefits

- Reliable watering for arenas
- Powerful pump with 3 year warranty
- Easy to tow around arena complex
- No additional equipment needed

What makes AquaDot trailers different?

We've got you covered

Very few (if any) of our competitors believe in their manufacturing process enough to offer a 5 year frame warranty and 1 year skid frame warranty. Our trailers are different; we take pride in providing the best product possible, delivered to your door. In addition to our manufacturer's frame warranty, we use only Norwesco tanks which provide a 3 year non-prorated tank warranty. Most all other tank manufacturers offer a prorated warranty, meaning if the tank is 75% through its warranty period that the warranty only covers 25% of the cost to replace the warranted tank. However, unlike the industry standard, **we use tanks with a non-prorated warranty.** What that means to you is that 100% of the tank is covered for the entire warranty period.

Stronger than the average

While commonly used for water hauling and spraying, our trailers are actually built to withstand use with heavier liquids. This gives you flexibility and peace of mind in knowing that your multi-purpose trailer can safely handle whatever you need. They are built to safely haul liquids such as water-based fertilizers (up to 11 lbs/gallon), whereas water weighs only 8.32 lbs/gallon. The frame also has high strength and active use with a manufacturing process that avoids cutting the channel iron wherever possible. Instead, the iron is bent and formed into shape, eliminating common weak points that are common with many other trailer frames. To add extra strength and ensure that there are no frame issues where the channel iron is bent, we reinforce it along the outside edge as well.

Things you don't see do matter

Have you ever purchased a trailer, only to find after a few months that rust is already showing? This results from a manufacturer that's more concerned with speed than with quality. You won't find that with AquaDot trailers. Our trailers get a good scrubbing before the powder coat paint finish is applied. Attention to even little details like this help ensure a long life for your trailer and are important to us.

Freight savings, shorter lead times, delivered fully assembled

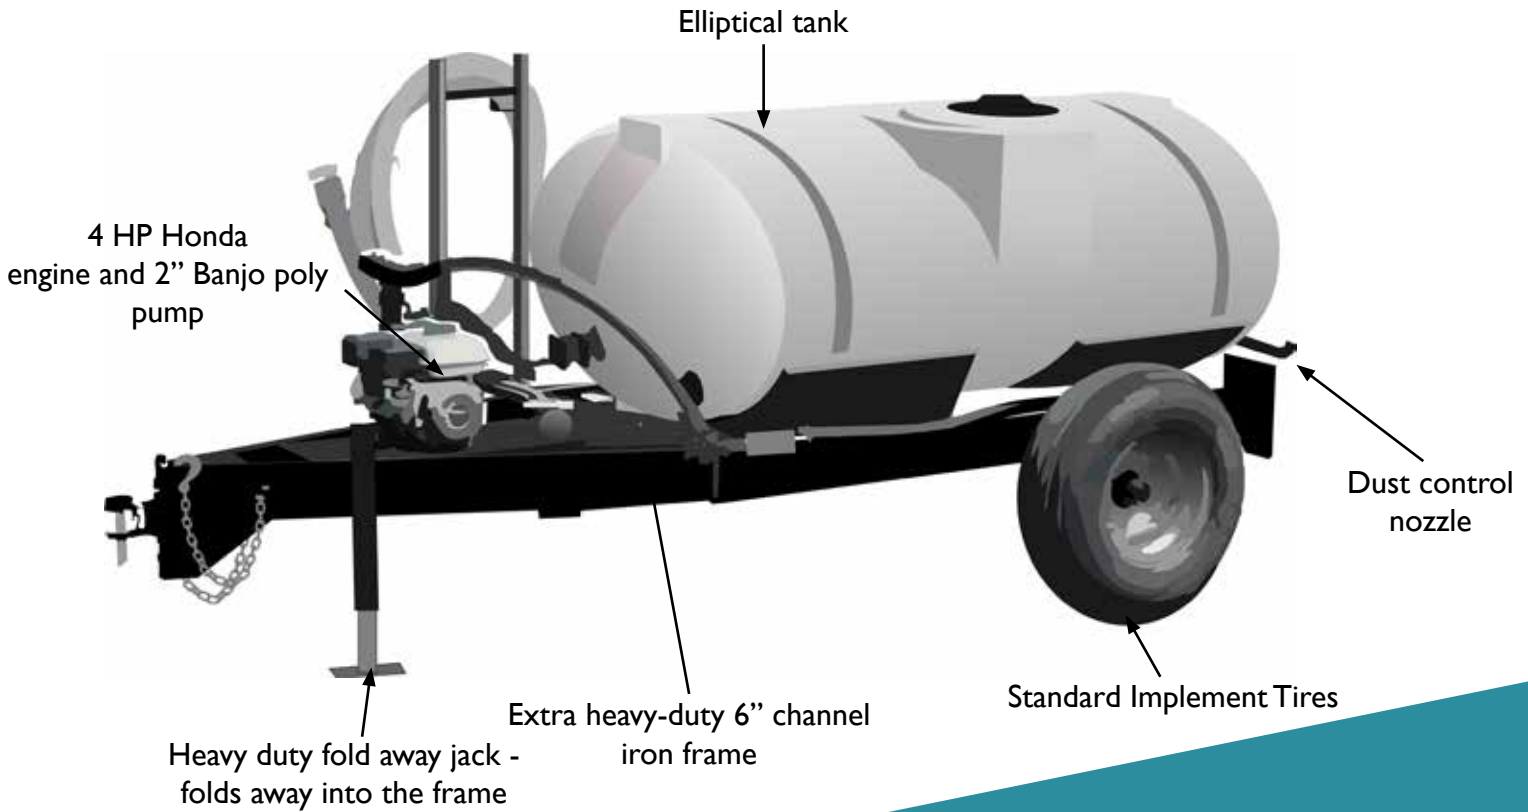

Select the shipping location that best fits your needs for freight and lead time. We ship from AL, AZ, CA, KS, KY, MN, ND, NE, WA. There's no need to wait for lead times of today's world - we always keep a supply of the AquaDot trailers in production.
