

# Biodegradable Stakes For Erosion Control Installation

**Biodegradable Stakes**

**Net Peg**

Biodegradable Stakes are an eco-friendly way to secure blankets, matting, geotextiles, and other landscaping materials. Made from fully degradable materials, these stakes work to secure fabrics on slopes, hills, and other erosion prone locations.

Standard stake options include 4", 6", or 8" pegs or smaller 3.5" pegs. When compared to standard wood or metal stakes, these stakes can offer a material that is safer for the environment and does not require any removal.

For tougher ground conditions, the 4" stake is an excellent choice. The 6" and 8" stakes are best suited for tilled or softer soils. The extra length can reach the hard soils underneath.

## **Models:**

- 4", 6", or 8" Green Biodegradable Stakes
- 3.5" Biodegradable Pegs

## **Perfect For Use With:**

- Landscaping Fabrics
- Geotextiles
- Jute Netting
- Coir, Jute, or Straw Blankets

## **Advantages:**

- 100% Biodegradable
- No Removal Required After Installation
- Equipped for Range of Locations and Fabrics
- Alternating Ribbed Design for Increased Strength

# Biodegradable Stakes

## Specifications

### Biodegradable Stakes

Biodegradable green 4”, 6”, or 8” stakes are the most environmentally friendly option and are made with fully biodegradable materials. These stakes are 100% fully compostable certified, making them ideal for bio-sensitive areas. Stakes include a 100% plant based PHA resin.

### Net Peg

The 3.5” net peg is a great way to grab and securing netting. These pegs have barbed points and a double-sided head that allows them easily grip materials.

Product	Size	Color	Break Down Time	Per Case
Biodegradable Stake	4”	Green	24-36 months	1000
Biodegradable Stake	6”	Green	24-36 months	500
Biodegradable Stake	8”	Green	24-36 months	300
Net Peg	3.5”	Green	12-24 months	1000

### Stake Installer

The stake installer ensures proper placement of stakes through an erosion control mat or blanket. It saves time and labor costs by installing a stake every 3-5 seconds. The installer is compatible with the 4” and 6” biodegradable stakes.

Product	Install Speed	Compatibility	Per Case
Stake Installer	3-5 Seconds	4” or 6” Stakes	6
