

Potable Water Trailer – 1000 Gallon NSF Certified for Safe Water Containment

This medium sized water trailer is DOT compliant for use on public roadways and can hold up to 1,000 gallons of potable water. The NSF certification is for all states in the US, including California, and ensures the quality and safety of use with drinking water. The state of the art algae resistant tank provides longer storage times with superior water quality maintained. The trailer features a Honda 4.0 hp pump, rugged steel frame, dual 6000lb axels, electric brakes, emergency breakaway system, DOT compliant lights, welded steel fenders, adjustable height coupler, 16” lockable manhole, and zero drain to empty the tank 100%. The elliptical tank design provides a lower center of gravity for safer towing. The molded in baffles are another safety feature provided that limits the amount of sway in the tank during transport.

1000 gallon Potable Water Trailer

Capacity	1000 gallons
Dimensions	Length: 14'7", Overall width 82", Height 85 1/2"
Underclearance	14" at axle
Weight	Empty 2,540 lbs, Loaded 10,540 lbs
GVWR	12,000 lbs
Recommended towing vehicle	One ton or larger
Axle	Tandem 6,000 lbs
Brakes	Electric on both axles
Wheels	Eight holes rims
Hitch	Adjustable 12,000 lbs rated Bulldog coupler with 2 5/16" ball
Tires	7.50 x 16 LT
Jackstand	Side-mount crank style, 12,000 lbs rated
Suspension	Five leaf slipper
Frame	6" channel, Steel saddle for tank support
Tank	Tank Polyethylene 3/8" thick, elliptical design, 16" manhole with 4" vert cap, Drain holes at bottom for cleaning, Baffles molded into sides of tank, Repairable and recyclable, NSF certified
Pump/Engine	Multiquip QP204h 2" centrifugal, 4.0 hp Honda engine with low oil alert "shut down", Discharge rate 142 GPM
Manufacturer's Warranty	3 years (tank), 1 year (trailer)

Additional options include:

High pressure pump, hose and reel, double jacketed fire hose, NSF rated hoses, spare tires, military spigot array, remote controlled electric valve, locking tank lid, step ladder, tool boxes.
