Seabin Corporate Sponsorship

Seabins for **Cleaner Oceans.**

Are you looking to create a positive public relations campaign for your brand? Consider a Seabin corporate sponsorship for community outreach and brand awareness. Either select a location in need of floating trash cleanup or we can help match you with a location. A Seabin is a floating trash skimmer that takes debris and plastics from calm water locations and keeps them in a catch bag until they can be recycled. The Seabin is powered by a pump to take in the polluted water and send clean water back into the body of water.

What is Your Brand Initiative Goal?

When considering a brand awareness initiative, a positive public relations outreach with a Seabin corporate sponsorship is a great opportunity. What message are you trying to send? What branding goals are you trying to achieve?

Do You Want Branding on Seabins?

Part of a successful public relations campaign from a brand awareness initiative is having your branding on or around the product you're sponsoring or promoting. Branded signage can be added near your seabin.

Where Do You Want Seabins Installed?

Seabins can be used in calm waters by dockside businesses and in harbors or marinas. Are you focusing your brand awareness initiative outreach towards an educational arena or in something more entertainment related?

Which Type of Maintenance Plan?

Seabins need to be regularly maintained in order to function properly. If your organization can't physically maintain the Seabins you sponsor, no problem. We have Seabin maintenance plans that fit your needs.
