Other Items to Consider for Your Liquid Storage Tank:

- **LIGHT-BLOCK™ Technology:** A tank that keeps sunlight out of the tank will stop algae from growing inside the tank. This is a huge benefit in preserving the quality and use-ability of your water.
- **Sight Glass Kit:** Being able to quickly see how much liquid you have left in your storage tank is a very handy add-on to get with your tank.
- **Cone Bottom Tank:** Choosing a cone bottom tank will enable you to drain your tanks 100% when switching liquids.
