Floating debris negatively affects our environment in a number of ways. Posing threats to fish, birds, marine life and quality of life in general. The series of booms is designed to collect, divert and control waterborne pollutants and is an integral part of any aquatic debris mitigation plan.

**Containment Boom**

The debris stops here.

Floating debris negatively affects our environment in a number of ways. Posing threats to fish, birds, marine life and quality of life in general. The series of booms is designed to collect, divert and control waterborne pollutants and is an integral part of any aquatic debris mitigation plan.

*The information and photos listed here are a guideline of the most common specifications for this product. As a service to you, we will provide comparable products fitting the specifications needed for your project and present you with the best priced options available.*
Made from a marine grade PVC, these barriers are designed to float on the water blocking or containing debris. Strong, durable and easy installation are a few of the reasons why Booms are a favorite for industry, homeowners, golf courses and construction companies looking to contain or control debris.

Applications

The floating debris boom has been used for both long and short term deployment in both saltwater and freshwater environments.

Common items contained

• Floating Plastic, Wrappers, Cups and Trash
• Seaweed
• Large Particles or Timbers
• Leaves and Branches
• Aquatic Plants
• Tsunami, Hurricane or Marine trash

Debris Boom Color Options

The standard color for all containment booms is yellow. However, booms are also available in colors that blend into the surrounding environment.

• Green
• Blue
• Black

Suggested Accessories

• Anchor Kits, Buoys, Shoreline Connectors, Tow Bridles and Floating Marker Lights
